Usage: The substrate is porous, absorbs water well, retains moisture. Fertilizers and microelements are selected so that plants can easily absorb them and fully satisfy their bioenergetic needs. Plants sown in the substrate grow well, and a higher yield is obtained. Before sowing, the substrate must be ventilated and additionally moistened.

Safety: The substrate does not contain hazardous substances, microorganisms and fungi that could harm plants, animals, or humans; there are no GMOs, hormones, pesticides, salmonella, brucella, nematodes; the substrate is not contaminated with plastic or foreign substances.

Storage conditions and shelf life: Store in a dry, ventilated place. Protect from direct sunlight. Best consumed within 12 months from the date of manufacture.
