

GP09481 DECORATIVE MULCH (RED BRICK COLOR), 50 L

pH
4,5-5,5

Composition

Chipped, painted softwood 0-30 mm 0-30 mm
100%

Additives

No additives

Fertilizers, microelements

Absent

Usage: Decorative mulch preserves moisture in the soil, retaining up to 60 percent of the water that evaporates. Protects roots from seasonal temperature fluctuations, maintaining a higher temperature in winter and cooler in summer. By blocking light, it creates unfavorable conditions for weed growth. Protects soil from erosion, preventing rain from washing away and wind from carrying away its particles. Allows roots to breathe more easily, keeping the soil looser. First, carefully remove weeds and loosen the soil evenly in the planting areas and beds. Cover the soil with 2-5 cm thick mulch. Before using mulch, we advise plants, such as rhododendrons, to fertilize once with nitrogen fertilizer. After 2-3 years, add 2-3 cm of mulch.

Safety: The mulch does not contain hazardous substances, microorganisms and fungi that could harm plants, animals, or humans; there are no GMOs, hormones, pesticides, salmonella, brucella, or nematodes; the decorative mulch is not contaminated with plastic or foreign substances.

Storage conditions and shelf life: Store in a dry, ventilated place. Protect from direct sunlight. Best consumed within 12 months from the date of manufacture.
