

## GP1468 DECORATIVE PEAT MULCH FOR GARDEN, 60 L

pH  
4,5-5,5

Conductivity (1:1)  
0,02 – 0,2 mS/cm

Moisture  
45-55%

### Composition

Chopped stump wood  
100%

### Additives

No additives

### Fertilizers, microelements

Absent

**Usage:** Mulch helps retain moisture in the soil, reduces soil water evaporation by up to 40 percent, protects the roots of mulched plants from temperature fluctuations - maintains a higher temperature in winter and a lower temperature in summer, and ensures optimal air permeability, maintains soil friability. Shredded wood residues contain xylitol - an organic substance that inhibits weed growth, promotes plant root development and partially protects against the spread of flies (fungus gnats). When used as a soil additive or mulch, weed growth can be reduced by creating a barrier that prevents weed seeds from germinating.

**Safety:** The mulch does not contain hazardous substances, microorganisms and fungi that could harm plants, animals, or humans; there are no GMOs, hormones, pesticides, salmonella, brucella, or nematodes; peat mulch is not contaminated with plastic or foreign substances.

**Storage conditions and shelf life:** Store in a dry, ventilated place. Protect from direct sunlight. Best consumed within 12 months from the date of manufacture.
