Usage: A highly effective substrate used in most flower and vegetable seedling nurseries, pots, and containers. By adding additional fertilizers and bioactive substances, the grower can easily adapt this substrate to the cultivation of specific plants. The amount of fertilizer added ensures normal plant nutrition for up to 3-4 weeks. It is recommended to additionally moisten and mix before use.

Safety: The substrate does not contain hazardous substances, microorganisms and fungi that could harm plants, animals, or humans; there are no GMOs, hormones, pesticides, salmonella, brucella, nematodes; the substrate is not contaminated with plastic or foreign substances.

Storage conditions and shelf life: Store in a dry, ventilated place. Protect from direct sunlight. Best consumed within 12 months from the date of manufacture.
