

GP2186 SUBSTRATE FOR HEATHERS, 20 L

pH
3,5-4,5

Conductivity (1:1)
0,5 – 0,9 mS/cm

Moisture
45-55%

Nitrogen (N)
80-120 mg/l

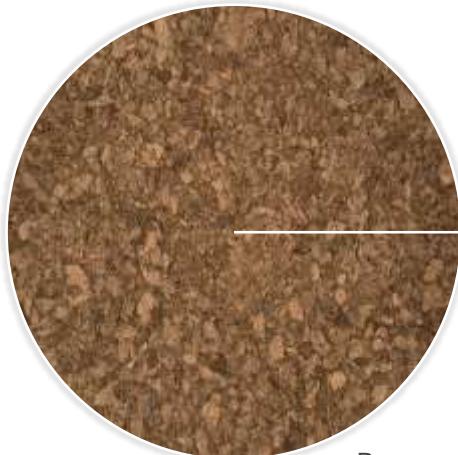

Phosphorus (P₂O₅)
90-140 mg/l

Potassium (K₂O)
100-150 mg/l

Composition

Brown peat 0-20 mm
100%

Additives

Water absorption agent 0,15 l/m³

Fertilizers, microelements

NPK fertilizers 14-16-18 0,8 kg/m³

Usage: The substrate is intended for acid-loving plants, has a stable structure and good porosity. Moss peat ensures an acidic substrate reaction, good water absorption. The substrate is enriched with all the nutrients necessary for plant growth, long-term fertilizers and microelements. For the best result, it is advisable to moisten the substrate well before using it. The used substrate is perfect for improving garden or vegetable soil.

Safety: The substrate does not contain hazardous substances, microorganisms and fungi that could harm plants, animals, or humans; there are no GMOs, hormones, pesticides, salmonella, brucella, or nematodes; the peat is not contaminated with plastic or foreign substances.

Storage conditions and shelf life: Store in a dry, ventilated place. Protect from direct sunlight. Best consumed within 12 months from the date of manufacture.
