Usage This soil is designed for growing herbs such as basil, parsley, dill, oregano, coriander, thyme, etc.; microgreens such as sunflower, radish, and pea, etc.; and medicinal plants such as mint, lemon balm, chamomile, sage, etc.. It is suitable for use in pots, trays, cell packs, containers, or raised beds. The substrate is made from brown and black sphagnum peat, enriched with Biohumus, perlite, zeolite, long-lasting action fertilizer and root growth stimulator Bioroot. The mixture ensures a balanced ratio of air, water, and nutrients, supporting uniform germination, strong root development, and vigorous plant growth.

Warranty The substrate is free from hazardous materials, microorganisms, and fungi that may harm plants. It is free from GMOs, hormones, Salmonella, Brucella, weed seeds, and nematodes.
